

# Homes

A **home** is a saved location you can teleport back to any time. Set one at your base, your farm, your favourite build — wherever you keep coming back to.

## Commands

- `/sethome <name>` — save your current spot as a named home
- `/home <name>` — teleport to one of your homes
- `/homes` — list all of your homes
- `/delhome <name>` — delete a home you no longer need

If you only have one home you can just type `/home` to go straight to it.

## How many homes can I have?

The number of homes you can set depends on your rank:

Rank	Homes
Member	3
VIP	5
Staff	10

Reached your limit? Delete one with `/delhome <name>` to free up a slot, or set a new home over an old one.

“ Tip: name your homes something you will remember — `base`, `farm`, `nether` — so you are not guessing later.
