

Overview

Nobody wants to walk everywhere. HellHold uses **EssentialsX** to get you around the world quickly — set personal homes, teleport to friends, and hop to public warps.

This book covers:

- **Homes** — save your own spots and teleport back to them.
- **Teleporting to Players** — ask to teleport to a friend (or pull them to you).
- **Spawn & Warps** — return to spawn or travel to the server's public locations.

*Heads-up: `keepInventory` is off, so if you die on the way somewhere your items go into a **grave** at the spot — see the *Graves* book.*
